

Specification

Electrical rating	100mA 30VDC;10mA 14VDC , 40T85
Electrical Life	100mA 30VDC 50,000 cycles 10mA 14VDC 200,000 cycles
Mechanical Life	500,000 cycles
Contact Resistance:	500mΩ Max. (initial)
Operating Force:	150±50gf
Insulation Resistance	50 MΩ Min.
Dielectric Strength	500VAC for 60±5 sec
Housing	UL94 HB

IP Protection

Series	Actuation Side	Terminal Side	OF	OP(NC)	OP(NO)
MQS-9C	IP 67	IP 00	150±50gf	9.45±0.20mm	8.95±0.20mm

Ordering Instruction

Version	Standard Version: 01 Custom-made:02,03,04,etc.						

Basic Dimensions

Common Characteristics

Circuit

Terminal type

Type A: Left angled PCB terminal

Type B: right angled PCB terminal

Type C: Straight PCB terminal

Type D: Solder terminal

Type E: Interlock terminal, side L

Type F: Interlock terminal, side R

Type W: Cable Outlet (W1)

Lever type

L01 (Leaf lever)

Housing type

Basic housing

Actuation Angle

Besides actuating the micro-switch vertically, the switch could be operated by cam-shaped or chamfered sliding actuators with an approximate value of max. 40°. Please refer to the technical specification for the specified conditions.

The approximate value of 40° was tested under the following conditions:

- Chamfered sliding material: POM.
- Polished chamfered sliding surface, greased with lubricant oil.
- Operation frequency : 30 cycles per minute.
- Operating travel until permissible end position measure "X" (see switch drawing).
